

DESCRIPTION

The flexible coupling permits to handle the radial, axial, angular and combined alignment defaults thanks to its unique element in rubber. It also can support strong couple and speed bumps.

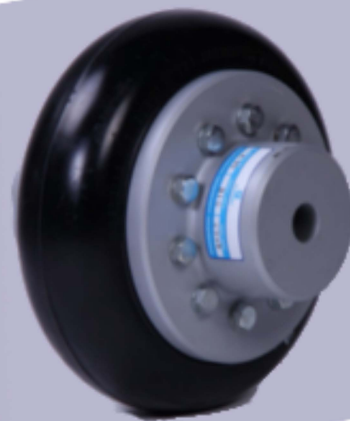

FEATURES

- ▶ Allows a misalignment between the shafts.
- ▶ Absorbs the vibrations and impacts.
- ▶ Easy to install.
- ▶ No need for lubrication.
- ▶ Economical.

APPLICATIONS

- ▶ Industrial ventilation system
- ▶ Compressor
- ▶ Conveyor
- ▶ Crane and hoist
- ▶ Escalator
- ▶ Extrusion machine
- ▶ Generators
- ▶ Industrial washing machine
- ▶ Mixer
- ▶ Printing machine
- ▶ Pumps
- ▶ Winches
- ▶ Windlass
- ▶ Wood machine
