

## DESCRIPTION

The shrink discs permit backlash-free connections between hollow and solid shafts by exterior tightening. The interne conical surfaces, pressed one against each other, pressed with screws, generate radial forces that insure the transmission of the couple by friction between the two shafts.

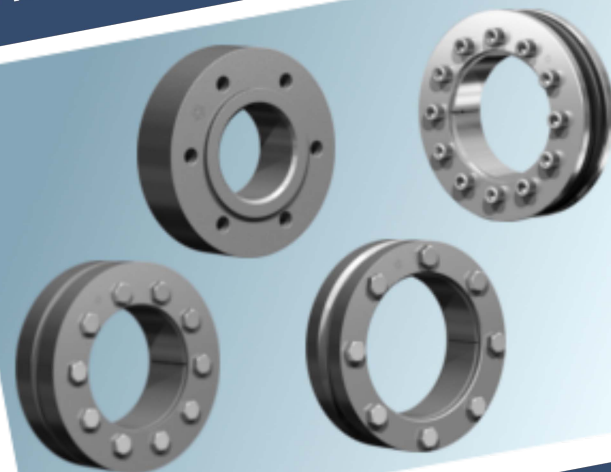

## FEATURES

- ▶ Accouplements à serrage extérieur.
- ▶ Transmission sans jeux de couples élevés.
- ▶ Version acier inoxydable en option.
- ▶ Standard range extended from a shaft diameter of 12mm.

## APPLICATIONS

- ▶ Antenna mast controller
- ▶ Aeronautic
- ▶ Aerospace
- ▶ Armament
- ▶ Crushing
- ▶ Weighing device
- ▶ Machine tool
- ▶ Motor and gear motor
- ▶ Servo-motors
