

PINBRAZING

DESCRIPTION

The PinBrazing is an electric connection method to the rail by micro brazing. No need to drill the rail.

OPERATION

- ▶ The brazing is made thanks to the mobile control unit Econect and the gun.
- ▶ The brazing is made directly on the rail.
- ▶ No fusion with the rail.

FEATURES

- ▶ Econect: less than 10kg
- ▶ Econect: 50 PinBrazing by charge.
- ▶ The econect is powered by a battery.
- ▶ Low brazing temperature.

ADVANTAGES

- ▶ Reliability of the connectivity.
- ▶ Very long resistance.
- ▶ Quick and easy to fix.
- ▶ Light and autonomous system.
- ▶ No need to drill the rail.
