

DESCRIPTION

The friction-springs are shock absorption system by friction of the interior and exterior rings with conical impact.

FEATURES

- ▶ High power absorption capacity at a weight and volume reduced.
- ▶ High shock absorption.
- ▶ No risks of overloading in integral compression.
- ▶ Independent operation of the rate of charge.
- ▶ Independent productivity of the temperature conditions.
- ▶ Maintenance free.
- ▶ Assembly possible in parallel or in succession.

APPLICATIONS

- ▶ Antenna mast controller
- ▶ Aviation
- ▶ Aerospace
- ▶ Armament industry
- ▶ Crushing
- ▶ Drilling machine
- ▶ Weighing device
- ▶ Machine tool
