

DESCRIPTION

Safeplug® is a rail web electrical connection system by insert.

OPERATION

- ▶ Additional conical contact in the insert that permits to secure the quality of the contact with the rail in all circumstances and during the entire product's life.
- ▶ SafePlug® Combi version: permits to install cables on both sides of the rail.
- ▶ Designed to have the lowest transitional resistance between the lug and the rail.
- ▶ Chamfered ring designed that the water cannot remain around the ring.

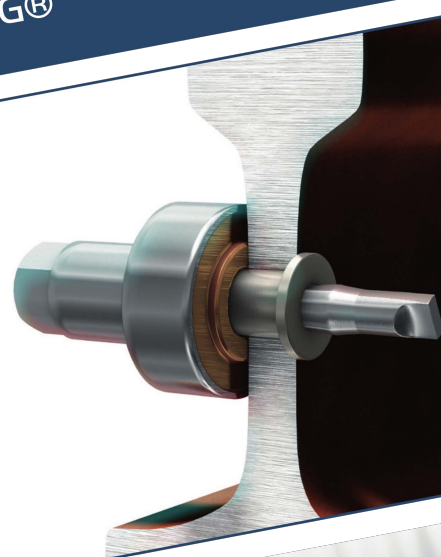

FEATURES

- ▶ Double contact surface in plated silver.
- ▶ Exclusive "High Torque" tightening: 120Nm of couple.
- ▶ High strength stainless steel bolt.
- ▶ Patented system.

ADVANTAGES

- ▶ Reliability of the connectivity.
- ▶ Resistant to corrosion in all circumstances.
- ▶ Easy and light equipment.
- ▶ No hydraulic tool needed to expand bushing.
- ▶ Easy to transport.
- ▶ Easy and quick assembly/ disassembly.
- ▶ High contact pressure.
